

Hi. I am writting concerning your expansion of LPFM stations. Sure they will help local stations get on the and promote their ideas. Yes, some national stations can keep these local stations off the air. Some of these national stations need to be off the air. Yes this could also stop monopolies of radio stations.

One nation radio network could suffer if this new expansion is passed. This station serves my community with a positive and encouraging message. They also support my local rescue missions which keeps some of the homeless off the street which saves us alot of money and makes the streets safer.

This station helps me keep my head straight and continue to be a productive member of society and not a drain on society like I was twenty years ago. There are continuous testamonies of lives being changed through this radio station. This radio station helps people stay productive members of society. If LPFM is expanded and KLOVE radio is removed in communities across the county, it will be a drain on these communities through social ills.

I truely believe that KLOVE radio is a benifit to all communities that it is on and it would be damaging to these communities if LPFM kicks KLOVE off the air.

Thank you for your time and i hope that take into consideration my comments when making a decision on expanding LPFM.
